WORK EXPERIENCE

Data Management Assistant (Co-op) | Kenna

January 2025 - August 2025

- Cleaned, validated, and maintained large datasets to support accurate records and reliable reporting.
- Used SQL and data quality checks to analyze information and improve integrity across operational workflows.

Game Tester | Electronic Arts (EA)

July 2025

- Tested an existing game build and documented gameplay issues, functionality, and user experience observations.
- Provided clear feedback on mechanics and player experience to help inform design improvements.

Website Redesign Coordinator (Co-op) | University of Guelph

May 2024 - August 2024

- Managed content migration from Drupal 7 to Drupal 9 while helping ensure AODA compliance.
- Supported user testing and gathered feedback to improve website usability and functionality.

SQL & ERP Developer (Co-op) | Superior Glove Works Ltd.

September 2023 - December 2023

- Developed a package-tracking API that delivered real-time shipment status updates across integrated systems.
- Contributed to development, debugging, collaboration, and project coordination across the software lifecycle.

Help Desk Associate (Co-op) | Superior Glove Works Ltd.

September 2023 - December 2023

- Resolved technical support requests related to hardware, software, account access, and system issues.
- Used Microsoft 365, Microsoft Intune, TeamViewer, and Jira to troubleshoot issues and support employees.

PROJECTS

MyFinance App

January 2022 - December 2024

- Designed and built an interactive personal finance app with dashboard features to support monthly spending visibility.

Molecule Webserver

GitHub Project

- Built a full-stack web application for creating, viewing, and managing 2D molecular structures through a web-based interface.

Client-Server System

GitHub Project

- Developed a C-based client-server system for transferring text files over TCP using socket programming and file handling.

AWARDS & LEADERSHIP

1st Place, University of Guelph Hackathon

January 2024

- Built an Android budgeting app in a competition with 100+ participants from 10+ Canadian universities.

President, Holy Name of Mary Secondary School Coding Club

January 2019 - 2020

- Assisted 20 students in preparing for a virtual hackathon through Java and C lessons.
- Hosted meetings and created lesson plans twice a week to support student learning.
